

For Schools & Classrooms

---

## Teach anything, one question at a time.

Practice and feedback are critical elements to student learning. Learningpod makes great practice free for everyone.

**Educators** – Find, adapt, and assign questions on any topic.

**Students** – Practice high-quality questions and get feedback 24/7.

**Administrators** – Use custom reports to track school progress.

### 1. 40,000+ questions you don't have to write yourself

Quickly find the questions you need for homework, quizzes, and more. We've got 40,000+ questions from trusted sources like Kaplan, Manhattan Prep, OpenStax College, Council for Economic Education and more.

### 2. Empower students with technology

Organize questions into sets ("pods") to create custom interactive quizzes. Learningpod automatically provides a summary to each student at the end of the pod so they can review and learn from their mistakes.

### 3. Remix our questions and create your own

Customize any of our questions with personalized explanations, or use the library as inspiration to create your own questions with our easy to use question editor.

## **School Pilot Bonus**

### 4. School-wide student reporting

Work with Learningpod to customize your school's report to see how students progress from quarter to quarter and year to year. Catch those who are falling behind and give extra help when needed.

---

## **Getting Started: No-Hassle Question Upload**

Have a stack of quizzes and homework you want to keep using? Send us a copy and we'll convert them into our interactive online format and add them directly to your personal dashboard, for free.

Questions? Email our outreach manager at [Scott@Learningpod.com](mailto:Scott@Learningpod.com).
