

# Learningpod Upload Program

UFT Charter School: [UFTupload@learningpod.com](mailto:UFTupload@learningpod.com)

Learningpod will now take all of your old quizzes, tests, and homeworks and add them directly to your Learningpod dashboard. This free program will digitize questions from spreadsheets, PDFs, Word documents, scanned documents and just about any other format into interactive online questions.

To start, just send us your files and the email you registered under. We'll digitize the content and convert it into our interactive web format. When it's done, it will all be added to your account where you can manage, update, and share it however you'd like.

## Content Types

Currently we accept multiple choice, multiple selection, short answer, and guided questions. If you have something different, [send us an email](#) and we may be able to help anyways.

If your question has an answer, be sure to tell us which one is correct when you send it. A multiple choice test with the answer key is a great example of what we can digitize.

## How to send us your files

Send individual files or a .zip containing multiple documents to this personalized email address: [UFTupload@learningpod.com](mailto:UFTupload@learningpod.com). Be sure to include answers and categorization where applicable.

## Notes

You are adding to content to your account on Learningpod.com and therefore must still abide by the Learningpod terms of service. Uploaded content will be made available freely.
